SureArchive™

Clinical Trial Certified Archive™ for Completed Study Projects

- Instant online access to archived study documents, medical images, reports and audit trail
- Secure FDA/EC/HIPAA compliance validated cloud service
- Certify your archive by digitally signing it with Adobe Trust Certificates
- Mobile, web and desktop interfaces
- Minimize paper storage costs
- On-demand offline export to HTML, PDF, .ZIP

SureArchive® is a secure FDA / EC compliance validated cloud service for long term online document retention, reporting, viewing and sharing.

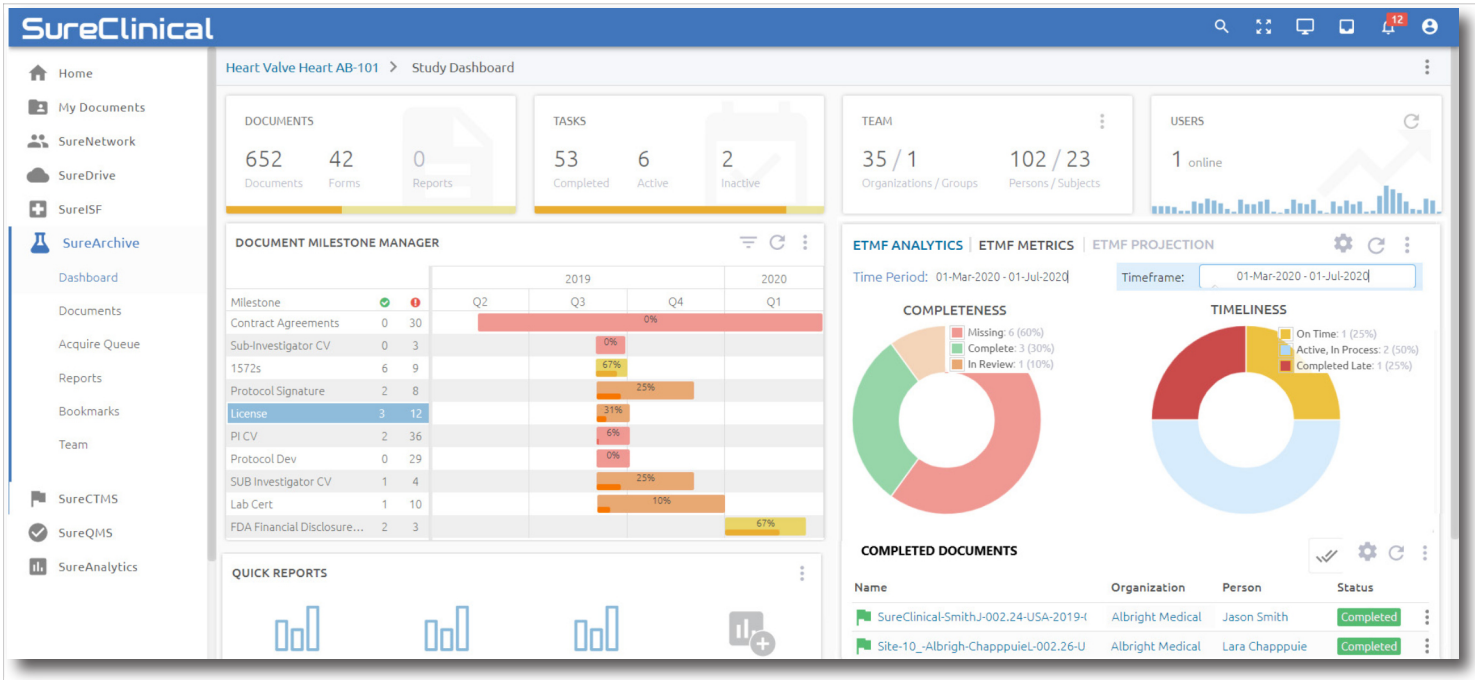

SureClinical's SureArchive Cloud Service enables the secure, long-term retention of clinical trial documents, medical images, reports and study data. Accessible online for instant viewing and sharing by your clinical study team globally from web and mobile devices, auditors, inspectors and regulators can be granted view only on demand access to selected clinical study data. Typically clinical trial data must be accessible over the long term, with the terms being largely dependent on the governing regulatory agency. For example, the FDA requires investigators to retain clinical trial documentation for a period of two years post marketing approval, whereas the EU EMA stipulates that sponsors must keep trial master file documents for a period of twenty five years.[1] Given these regulations and the requirement to deliver archived documents to inspectors upon request within relatively short periods of time, sponsors are seeking ways to meet their archiving requirements through cost-effective, cloud-based solutions. With SureArchive, Inspectors and study teams can access archived clinical trial documentation online instantly.

Key Benefits

- Easy to learn, easy to use modern user interface
- One button click to lock study and archive it
- Cost efficient cloud offering with long term options
- Automate archiving processes
- Cost savings of up to 80% over paper storage

Key Features

- SureExport® enables on-demand export of completed study documents, reports and audit trail with a manifest to a digitally signed Certified Archive using HTML, PDF, .ZIP and XML.
- Designed for mobile: Supports access from web or mobile
- Add final study docs for up to six months before lock
- Configurable folder access permissions

SureArchive® provides auditors, inspectors and study staff with on-demand access to completed study ETMF and eISF archives. With a full-use ETMF for six months after study close out, you'll have the ability to add final docs to your study before you lock it.

SureArchive™

SureClinical
Health Science Applications

FDA / EU Validated Certified Archive™ for Completed Studies

The SureArchive Cloud Service provides sponsors with an accessible yet indelible clinical trial document archive, offering sponsors assurance that their document management regulatory obligations are being met and ensuring the integrity of their records. Inspectors and other authorized study personnel can access and search for archived clinical trial documentation online instantly, without the time consuming job of sifting manually through paper records in a physical storage facility.

SureArchive is available as a cloud subscription service, offering access to trial documents for authorized personnel. SureArchive supports two usage scenarios with **two SureArchive Editions**:

- **SureArchive Online™ -** Ideal for moving Hybrid Paper and Electronic Docs online**:** Sponsors or clinical research sites that have old, paper-based or hybrid paper and electronic study documentation and would like to move towards a fully electronic, online system for the secure long-term maintenance of clinical trial records. With this approach, you'll have continuous online access to our cloud service and your study docs for 3 named users for the archive contract term.
- **SureArchive Coldline™ -** Great for Completed Study Essential Doc Archiving**:** Sponsors or clinical research sites that have received marketing approval for their drug, therapy or device and would like to switch from their SureClinical cloud service to a long-term SureArchive solution may wish to utilize SureArchive Coldline Storage Edition. This option is the most affordable approach, and utilizes a process similar to 'freezing and thawing' your data. After your study is archived, it is 'frozen' in cold storage. To access the study data, you'll make a data retrieval request, and your data will be 'thawed' and made available within one business day for access. Coldline storage data retrieved data is then made available online to up to three users for a minimum of 1 month, where you'll have full on-demand access to the Certified Archive for inspection and audits. SureArchive Coldline Storage provides you with the most affordable option for EU EMA mandated archiving terms of up to 25yrs.[1]

Compare SureArchive Features and Editions

SureArchive Feature	SureArchive Online	SureArchive Coldline*
Continuous on-demand archive availability	Yes	Retrieval required
Export to ZIP, PDF, HTML for offline access	Yes	Yes - after retrieval
Add study documents for up to 6 months before study lock	Yes	No
Audit trail report for study term by user, activity type, date, IP address and more	Yes	Yes
Configurable folder permissions for auditors, inspectors, viewers	Yes	Yes - after retrieval
Certified Archive™ - Adobe digitally signed archive to ensure viewers, recipients of archive integrity	Yes	Yes - after retrieval

*__Coldline Edition__: Coldline is designed for data a business expects to touch less than once a year. Coldline data can be retrieved on-demand. A data retrieval fee based on the SureArchive Online monthly rate will apply at a one month minimum for each retrieval event on top of any Coldline rate.

Deploy a Best In Class eClinical Solution with SureClinical and Dell Boomi

A best in class application eClinical solution for your enterprise begins with selecting the best applications for your enterprise, and then implementing them on top of a proven application data sharing system. The diagram below shows how our clients are deploying best in class eClinical systems with SureClinical and Dell Boomi, the industry's leading cloud integration technology. With Dell Boomi and SureClinical's Dell Boomi Connector, you can connect virtually any data, datasource or enterprise system.

Why do you need eClinical Application Data Integration Capabilities?

Often data resides in disconnected systems, prohibiting global teams from effectively accessing, analyzing or leveraging valuable study, project and operations data across the enterprise. As your team and the amount of data grows, without a way to efficiently and accurately share data, team productivity, data quality and efficiency drops. Working together with leading integration partner Dell Boomi, SureClinical has provided an eClinical application data integration platform that provides global clinical and enterprise teams with access to the data they need to complete their jobs, anytime, anywhere. With SureClinical's Dell Boomi connector and the Dell Boomi platform, you'll be able to rapidly connect to existing data and systems (connector fees may apply). Accelerate your time to value with SureClinical and Dell Boomi.

FDA 21 CFR Part 11, EC Annex 11 Compliance Validated

SureClinical's applications, data center, processes and systems are 21 CFR Part 11 and EC Annex 11 compliance validated. All data at rest and in transit is encrypted; we offer high security application instances with hourly backups.
