SureClinical

Life Science Cloud Applications

Who We Are

SureClinical designs, develops and delivers innovative life science cloud applications that help streamline and accelerate the delivery of new drugs, therapies and treatments to patients worldwide.

Our full suite of unified applications, an enterprise collaboration platform and clinician Network enable Life and Health Sciences organizations to optimize their Clinical Trial processes and get to market faster.

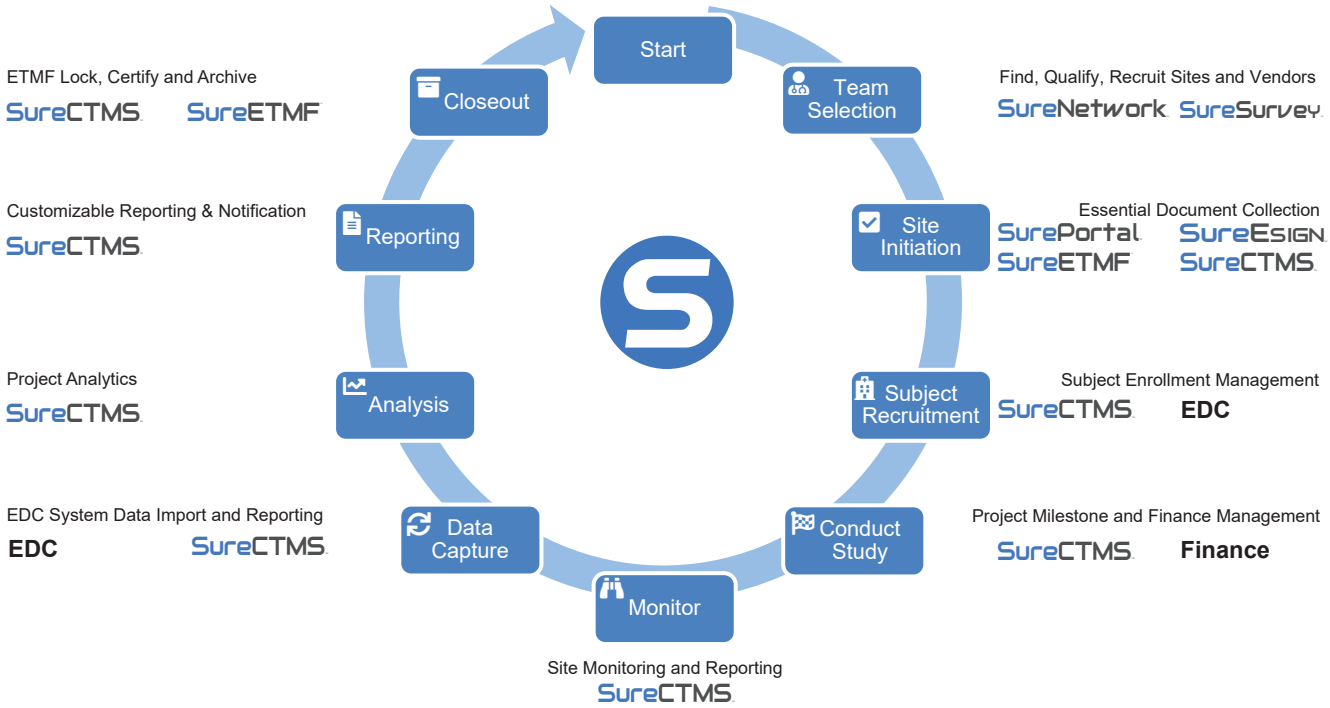

Compliance is in our DNA

SureClinical is a premier provider of eClinical Cloud Applications. Everything we do is FDA, EC, HIPAA and GAMP5 compliance validated.

Addressing the Entire Clinical Lifecycle

Our suite of eClinical Applications, Platform and Network addresses the entire clinical trial lifecycle:

CLINILABS

SureClinical Optimized our Study Startup

"With SureClinical, we were able to reduce our study startup time by over 50%. With SurePortal we completed study startup for a 100 site study in less than 90 days. " -**Charity Cowley , Clinilabs**

Unified Life Science Application Suite

Solution

Suite of Unified Applications

With our suite of unified applications, your data integrity is assured. All applications work seamlessly together, helping you go digital in minutes, not months.

Collaborative Platform

Our secure team portals help you to automate the Capture, digitally eSigning, and Tracking of essential documents and data in real-time, so you'll always know what you have and where you are with your project.

Adobe Digital Signing

Automate routine, repetitive tasks such as scanning, uploading, tagging and tracking with task automation workflows linked to real-time dashboards and reporting.

Workflow Automation

Simplify and streamline data capture, fillable form and survey completion, document review, approvals, digital signing and more with SureWorkflow, SureClinical's cloud based process automation solution.

Real-time Dashboard Analytics

SureCTMS provides a global status view of all projects. Each project has its own configurable dashboards and metric gadgets with the ability to drill down for details in context.

Enterprise Connectivity

Our Enterprise application connectors give you real-time access to your data that matters, such as EDC data, Microsoft Contacts, Calendar, document repositories, financial systems, files, databases and more.
