- Easy to use Mobile Web design
- Enterprise Integration
- Private Team Network
- Adobe® signing & Workflows
- Broad set of integrated apps
- FDA/EC Compliance Validated

SureCTMS

Get started in minutes, not months

Biopharma and device companies seeking to reduce development costs, enhance product quality and accelerate therapeutic product delivery are adopting clinical trial project management systems (CTMS) for use in global clinical trials. However, many CMTS systems in use today were developed over 10 years ago on older technologies that cannot support the demanding needs of clinical trial operations. Today's clinical trial knowledge workers expect cloud-based access to information, digital signing and workflows, team collaboration and more – frequently from their smartphone at the point of activity.

Unlike dated legacy CTMS applications that were developed years ago, SureCTMS was architected and purpose-built on a cloud-based, mobile web applications platform thatruns and looks the same whether a user is on a smartphone or a laptop. By integrating a broad and growing suite of eClinical applications on an FDA/EC compliance validated cloud platform, SureClinical offers an easy to use, easy to learn cloud CTMS that was built for today's mobile knowledge worker who needs a 360 degree anytime, anywhere view of key clinical trial data, documents, analytics, reports, financials, activities and more.

Key Benefits

- Next generation cloud and mobile-first UI design saves your team time, money and enhances productivity
- Easy to learn, easy to use modern user interface
- Fast implementation in as short as one day
- Automated processes and milestones insure quality
- Staff time savings of up to 90% over manual processes

Key Features

- SureNetwork Private Network - Like a LinkedIn® for life sciences, SureNetwork helps you to quickly find, qualify and add trusted credentials for investigator sites, PI's, vendors, persons and staff to your projects.
- Fully integrated suite of eClinical apps and services
- Adobe digital eSign and Review for mobile doc completion
- Integrated clinician portal for essential document capture

Everything, Everywhere™

Give your project team instant access to collaborative project tools with SureCTMS. All SureCTMS features are available everywhere - Web, Android/ Apple smartphones and tablets - no installation is required!

Next Generation Clinical Trial Management and Collaboration

Benefits

Study Team Network

Accelerate Study Startup

- Quickly Find, Qualify, Invite, and Add Sites, PI's, Team Members
- Searchable by experience, location and other criteria
- Collaborative Private Network
- Import/Export Team Profiles and Documents such as Study Experience, CV's, Licenses, Education, Certifications
- Create, Manage Staff Profiles for Employees, Contractors

Dashboard Analytics

Proactive Project Status

- Manage, track and complete your projects more effectively and efficiently
- Improve project quality wit measureable metrics, accessible everywhere
- Customizable dashboard analytics, configurable at the system and user levels
- Export dashboard analytic data to PDF and CSV formats
- Proactive project status notifications

Next Generation Clinical Trial Management and Collaboration

Benefits

Activity and Task Workflows

Automate Project Tasks

- Automate repetitive tasks such as monitor visit report completion and approvals, essential document completion, tagging, signing, SOPs
- SureSurvey™ - complete surveys, monitor visit questionnaires via workflows. Generate PDFs for Esigning anywhere
- Library of configurable workflows, customizable data driven web forms for clinical operations.
- Workflow monitoring and tracking tools

SureCTMS Features

Summary

Team Selection

SURE NETWORK

The process of finding, qualifying and selecting the best investigators and sites for your clinical trial team can take months and can cost hundreds of thousands of dollars. SureNetwork helps you find trusted clinicians in minutes, not months, saving you time and money in the critical clinical trial startup phase. SureNetwork Private Network is included with SureCTMS.

Site Initiation

AUTOMATE ESSENTIAL DOCUMENT CAPTURE, TAGGING AND TRACKING

Rapid patient enrollment is critical - however, traditional systems force your team to manually upload, tag and classify essential site documents, wasting valuable time. Instead, use SurePortal with Esign to digitally complete, classify and automatically add docs to a central QA area. You'll save up to 90% over outdated manual approaches.

Subject Recruitment

AUTOMATE ESSENTIAL DOCUMENT CAPTURE, TAGGING AND TRACKING

SureCTMS provides multiple subject recruitment and enrollment tools, covering both automated and manual study subject data capture. Do you have a separate electronic data capture (EDC) system that you want to import data from? SureClinical supports automated subject data import from EDC systems (optional EDC connector and EDC API access required).

SureCTMS Features

Summary

Conduct Study

MANAGE GLOBAL PAYMENTS FOR SITES

Capture project budgets, payments and financial activities with global multi-currency support. Manage Activities and Tasks with Project, Payment, Protocol and Personal calendars with Outlook® integration; manage sites and vendors, study subject treatments and deviations.

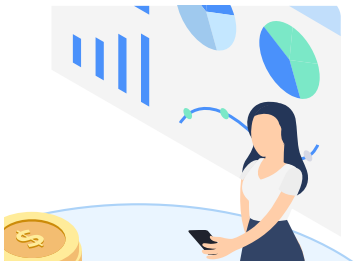

Monitor

AUTOMATE TASK COMPLETION

Automated the completion of project activities and tasks using workflows, and then track workflow completion using dashboard analytics and gadgets. For example, create a Monitoring Visit Report workflow with Adobe PDF® form completion and esigning for each site. As the workflows are completed, get real time progress updates and notifications.

Data Capture

DATA CAPTURE

With SureClinical's open platform and SureInterface approach, capturing, collecting and importing data has never been easier. We provide you with both manual and automated tools for data capture, using datasources from inside and outside of SureCTMS. With our SureInterface integration option, you can import data from external systems and databases.

SureCTMS Features

Summary

Analysis

ANALYSIS

SureClinical provides you with a set of configurable project analysis tools, metrics, quality analysis and proactive notifications that helps you to manage, track and complete your projects more efficiently and with higher quality, across nearly every device, everywhere.

Reporting

REPORT WIZARD WITH REPORT SUBSCRIPTIONS AND NOTIFICATIONS

Every one of our reports is user-configurable and user customizable. SureCTMS includes a simple to use report wizard that let's you tailor reports to your needs. Custom or standard reports can be shared with others on your team using our report subscription and report scheduling and notification feature.

Closeout

STUDY ARCHIVE AND DATA LOCK

For completed studies, SureClinical offers SureArchive, an affordable online archive for Study Documents, Study Data, Reports and audit trail information.

Summary

SureClinical and Dell Boomi

Best In Class eClinical Solution

A best in class application eClinical solution for your enterprise begins with selecting the best applications for your enterprise, and then implementing them on top of a proven application data sharing system. With Dell Boomi and SureClinical's Dell Boomi Connector, you can connect virtually any data, datasource or enterprise system

Connect With:

- Electronic Data Capture
- Safety Applications
- Medical Imaging
- Financial Systems
- Document Repositories
- Databases

Ensure Audit Readiness

Compliance Validated

eClinical Application Data Integration Capabilities

Why Do You Need To Upgrade?

Often data resides in disconnected systems, prohibiting global teams from effectively accessing, analyzing or leveraging valuable study, project and operations data across the enterprise. As your team and the amount of data grows, without a way to efficiently and accurately share data, team productivity, data quality and efficiency drops. Working together with leading integration partner Dell Boomi, SureClinical has provided an eClinical application data integration platform that provides global clinical and enterprise teams with access to the data they need to complete their jobs, anytime, anywhere. With SureClinical's Dell Boomi connector and the Dell Boomi platform, you'll be able to rapidly connect to existing data and systems (connector fees may apply). Accelerate your time to value with SureClinical and Dell Boomi.

SureCTMS

Go Digital Today

SureCTMS may be purchased separately or as part of our 'Go Digital' cloud applications packaged offering. Whether you have a legacy CTMS or are evaluating new CTMS solutions, email or call SureClinical call today for more information.
