SureEsign™

FDA Part 11 Validated Adobe® Digital Certificate Signing

Eliminate Paper with Automated Review, Approve and Esign

- Adobe® Certificate signing
- Esign Everywhere™ cloud - Mobile, web and desktop with no client download
- Meets new FDA 2018 guidance for Form 1572 digital certificate signing and completion
- Multiparty, multidocument signing and Workflows
- Signing Audit trail and Compliance Portal

Completing, wet signing, scanning, tagging and manually processing paper documents is a costly and time consuming effort. In contrast, digital certificate signing, a high trust form of electronic signing, enhances quality and reduces costs over manual paper based approaches. SureClinical's SureEsign® offers Adobe® Digital Certificate signing - the gold standard in signing, accepted by governments and agencies globally. As compared to simple electronic signing, digital certificate signing assures document integrity - proving that the document hasn't been modified after review and approval by all signatories.

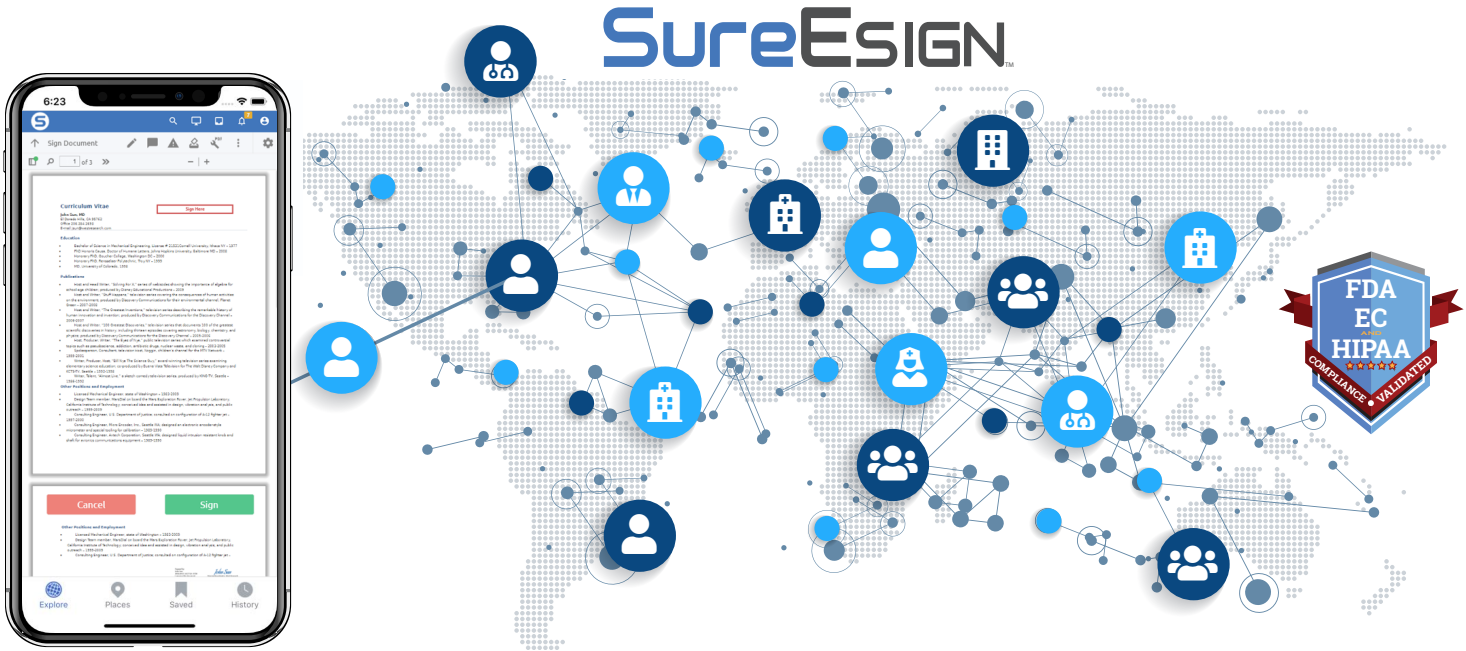

SureEsign® with Adobe® digital certificate technology provides signing party authentication, allowing document recipients to authenticate the identity of the signing party, a feature that basic electronic signing doesn't offer. Digital certificate document signing can provide time savings of up to 90% over manual signing methods, with cost savings on overnight courier fees, paper storage, handling, scanning, tagging costs and archiving fees. With the quality, integrity and cost savings benefits, its no surprise that the FDA has recently provided guidance to industry that Adobe PDF forms submitted to the FDA be completed digitally, and digitally signed with Adobe digital certificate signing technologies.[1]

Key Benefits

- Easy to learn, easy to use modern user interface
- Document integrity, signing party authentication
- Cost efficient cloud offering
- Automate review, approval, signing processes
- Cost savings of up to 90% over paper approaches

Key Features

- Integrated SurePortal® for external party document workflow completion, signing, reporting and audit trail
- Designed for mobile: Apple/Android phones, tablet support
- Multifactor authentication supports secure external signing
- Complete and digitally sign PDF forms, surveys via workflow
- Access to SureNetwork Private Healthscience Network

SureEsign provides compliance validated FDA Part 11 Adobe Digital Certificate Signing for Health Science organizations. Use SureEsign trusted signing on mobile devices for both clinical and commercial operations.

SureESIGN™

SureClinical
Health Science Applications

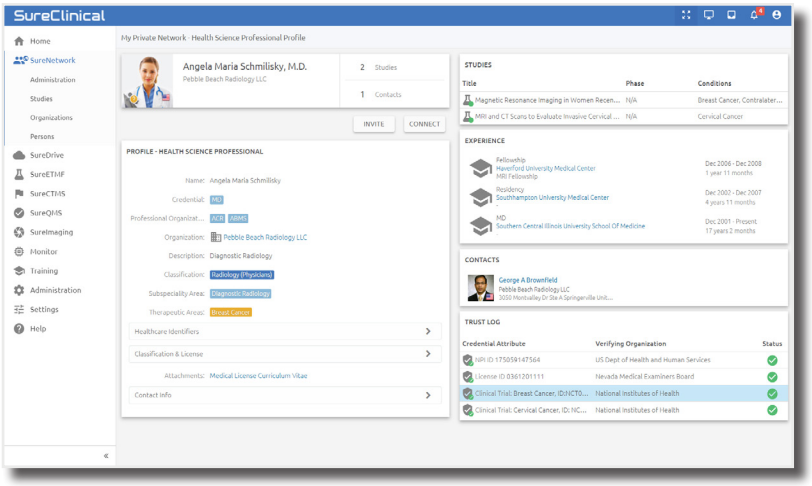

More Than Just eSigning - Get a Platform for Health Sciences

SureEsign includes our Compliance Validated Platform for Clinical Operations, including:

SureNetwork

- Quickly Find, Qualify, Invite, and Add Sites, PI's, Team Members
- Searchable by experience, location and other criteria
- Collaborative Private Network
- Access Person and Org Profiles and Documents such as Study Experience, CV's, Licenses, Education, Certifications

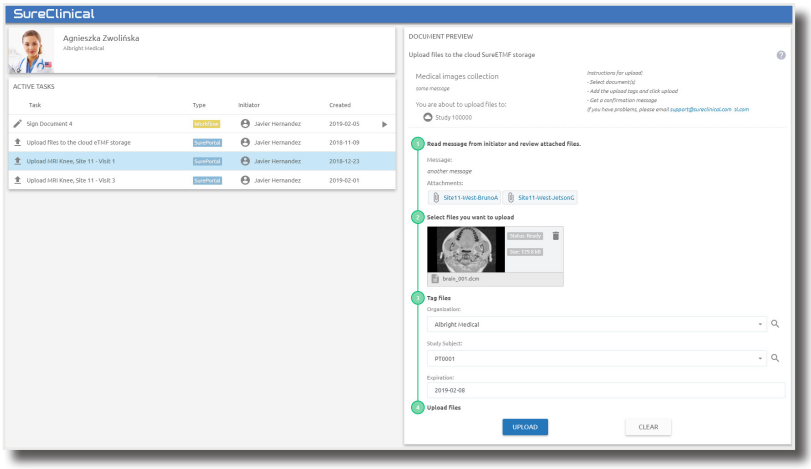

Accelerate Site and Vendor Recruitment

SurePortal

- External Orgs, Persons can securely complete and esign - documents, forms, surveys, uploads
- Supports documents and medical images (all major DICOM modalities)
- Integrates with your web applications and workflows
- Simple Drag and Drop UI
- FDA Part 11 Compliance Validated

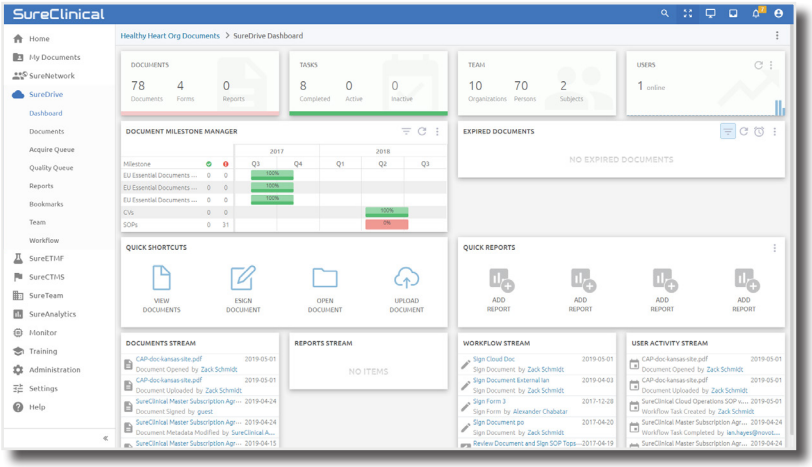

Automate Project Tasks

SureDrive

- Manage, track and complete electronic documents, content and files more effectively and efficiently
- Access eSigned documents from mobile, web, email
- Admin configurable sharing settings
- Controlled document managment
- Integrated with SureWorkflow

Compliance Validated Content Storage Cloud

SureEsign™

Health Science Applications

Unify your Health Science Applications

Deploy a Best In Class eClinical Solution with SureClinical and Dell Boomi

A best in class application eClinical solution for your enterprise begins with selecting the best applications for your enterprise, and then implementing them on top of a proven application data sharing system. The diagram below shows how our clients are deploying best in class eClinical systems with SureClinical and Dell Boomi, the industry's leading cloud integration technology. With Dell Boomi and SureClinical's Dell Boomi Connector, you can connect virtually any data, datasource or enterprise system.

Why do you need eClinical Application Data Integration Capabilities?

Often data resides in disconnected systems, prohibiting global teams from effectively accessing, analyzing or leveraging valuable study, project and operations data across the enterprise. As your team and the amount of data grows, without a way to efficiently and accurately share data, team productivity, data quality and efficiency drops. Working together with leading integration partner Dell Boomi, SureClinical has provided an eClinical application data integration platform that provides global clinical and enterprise teams with access to the data they need to complete their jobs, anytime, anywhere. With SureClinical's Dell Boomi connector and the Dell Boomi platform, you'll be able to rapidly connect to existing data and systems (connector fees may apply). Accelerate your time to value with SureClinical and Dell Boomi.

FDA 21 CFR Part 11, EC Annex 11 Compliance Validated

SureClinical's applications, data center, processes and systems are 21 CFR Part 11 and EC Annex 11 compliance validated. All data at rest and in transit is encrypted; we offer high security application instances with hourly backups.
