SureNetwork™

Private Edition

Trusted Clinician Database for Health Sciences

Maximize Success, Enhance Quality and Reduce Costs

- Global database of trusted clinicians
- Verified licenses
- Verified Clinical Study Experience
- Site Performance Metrics
- Click to add TrustedCredential™ profiles for sites, clinicians to your project

Finding, qualifying and activating clinical study sites, vendors and qualified clinicians for clinical trials can be a costly and time consuming effort. According to recent research on the factors most impacting clinical trial success and failure, after product efficacy, effective site selection and subject enrollment is cited as the single most significant success factor in clinical trial project success. On average, research shows that it can take as long as one year to find, initiate and activate a site - so site selection is critically important.[1]

With SureTeam™ and SureNetwork, you can rapidly identify qualified sites, clinicians, vendors and study staff within minutes, not months, saving you time, money and minimizing project risk. You'll have the option of searching and recruiting from SureClinical's global network of Sites, Vendors and Clinicians for your project, currently at over four million entities. Utilize SureTeam's™ smart analytic search tools and performance metrics to get intelligent suggestions for the clinical sites, vendors and clinicians that meet your selection criteria. With SureTeam, you get data that is based on actual performance, clinical trial experience, licensing, therapeutic areas of expertise, organization affiliations by location, helping you to reduce site selection errors, accelerate speed to study startup and ensuring higher levels of clinical study project success.

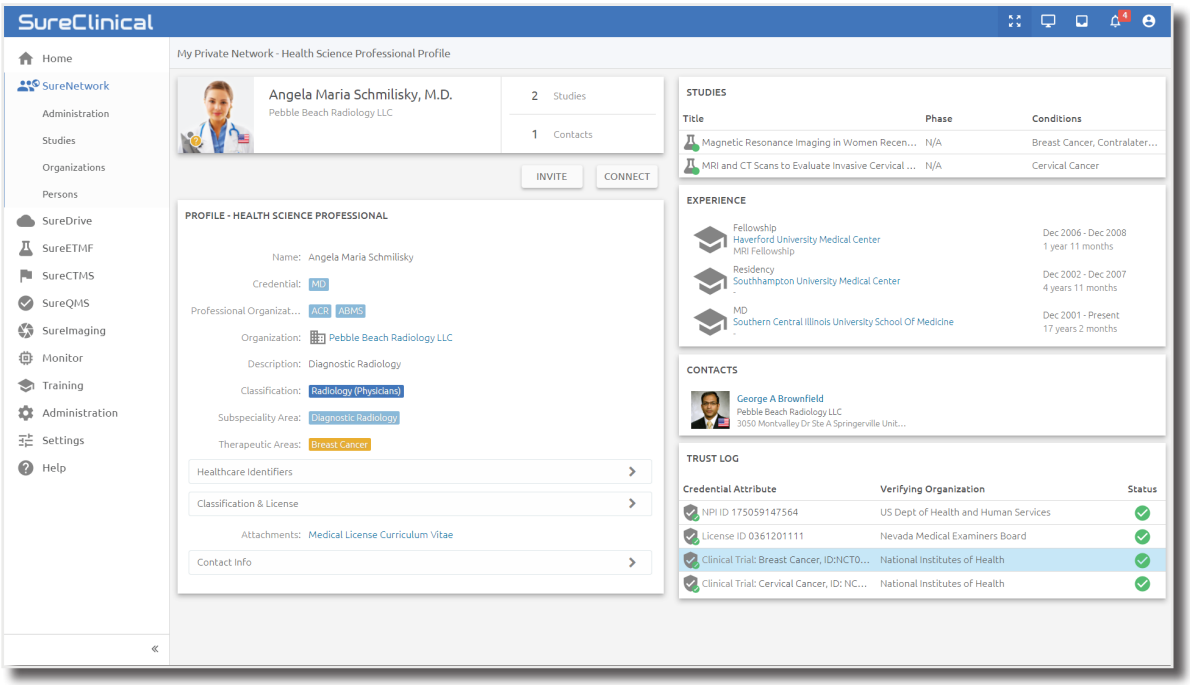

Key Benefits

- Save time in site recruiting and selection
- Easy to learn, easy to use modern user interface
- Fast implementation in as short as one day
- Automated processes and milestones insure quality
- Staff time savings of up to 90% over manual processes

Key Features

- Fully integrated Clinician Network, CTMS, ETMF, EDC systems
- Utilizes SureNetwork Private Network - Like a LinkedIn® for life sciences, SureNetwork helps you to quickly find, recruit, qualify and add investigator sites, PI's, vendors, persons and staff to your projects.
- Integrated web portal for qualification surveys and docs

Get projects started faster and close them with better results using SureTeam and SureNetwork. Find, qualify and add trusted sites, clinicians and vendors in SureNetwork. Site, Vendor workflows and more!

SureNetwork™

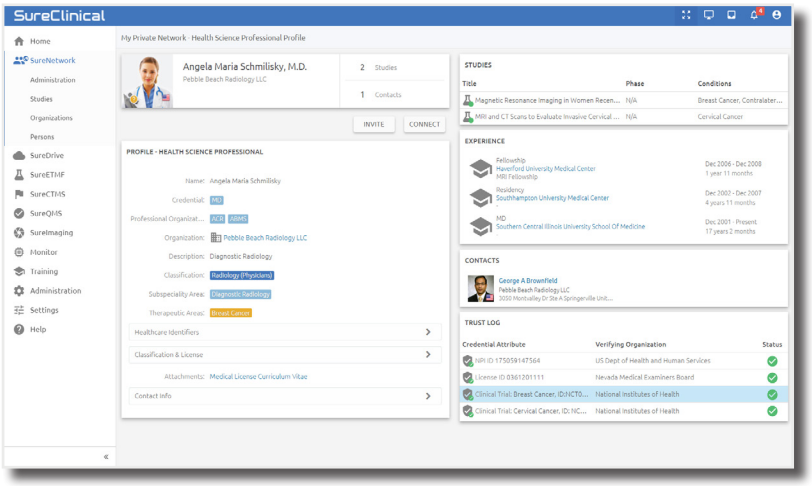

SureClinical
Health Science Applications

Automate Site Selection and Study Startup

Study Team Network

- Quickly Find, Qualify, Invite, and Add Sites, PI's, Team Members
- Searchable by experience, location and other criteria
- Collaborative Private Network
- Import/Export Team Profiles and Documents such as Study Experience, CV's, Licenses, Education, Certifications
- Create, Manage Staff Profiles for Employees, Contractors

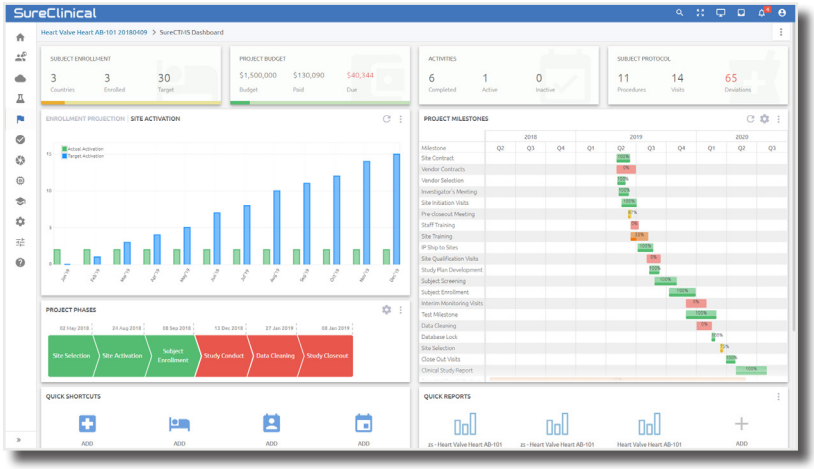

Accelerate Site and PI Selection

Dashboard Analytics

- Manage, track and complete your projects more effectively and efficiently
- Improve project quality with measureable metrics, accessible everywhere
- Customizable dashboard analytics, configurable at the system and user levels
- Export dashboard analytic data to PDF and CSV formats
- Proactive project status notifications

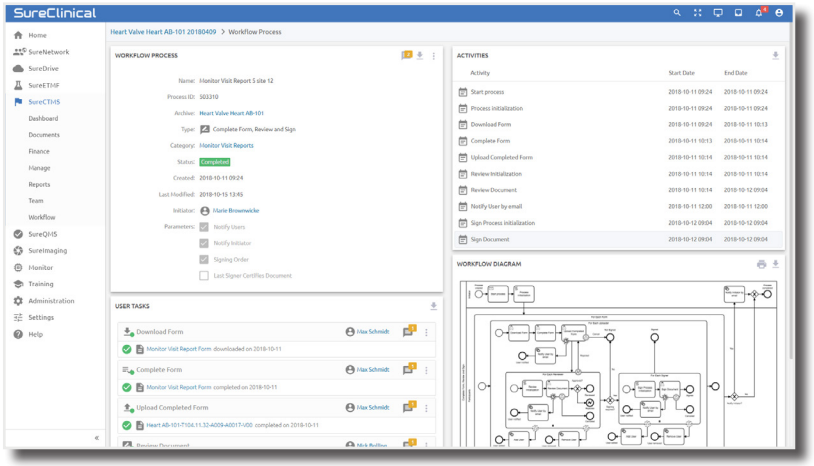

Proactive Project Status

Activity and Task Workflows

- Automate repetitive tasks such as monitor visit report completion and approvals, essential document completion, tagging, signing, SOPs
- Library of configurable workflows for monitor visit reporting, multi-level review, approve, esign and more
- Utilize Adobe PDF Forms, Adobe Certificate signing for trusted document completion and digital signing.
- Workflow monitoring and tracking tools

Automate Project Tasks

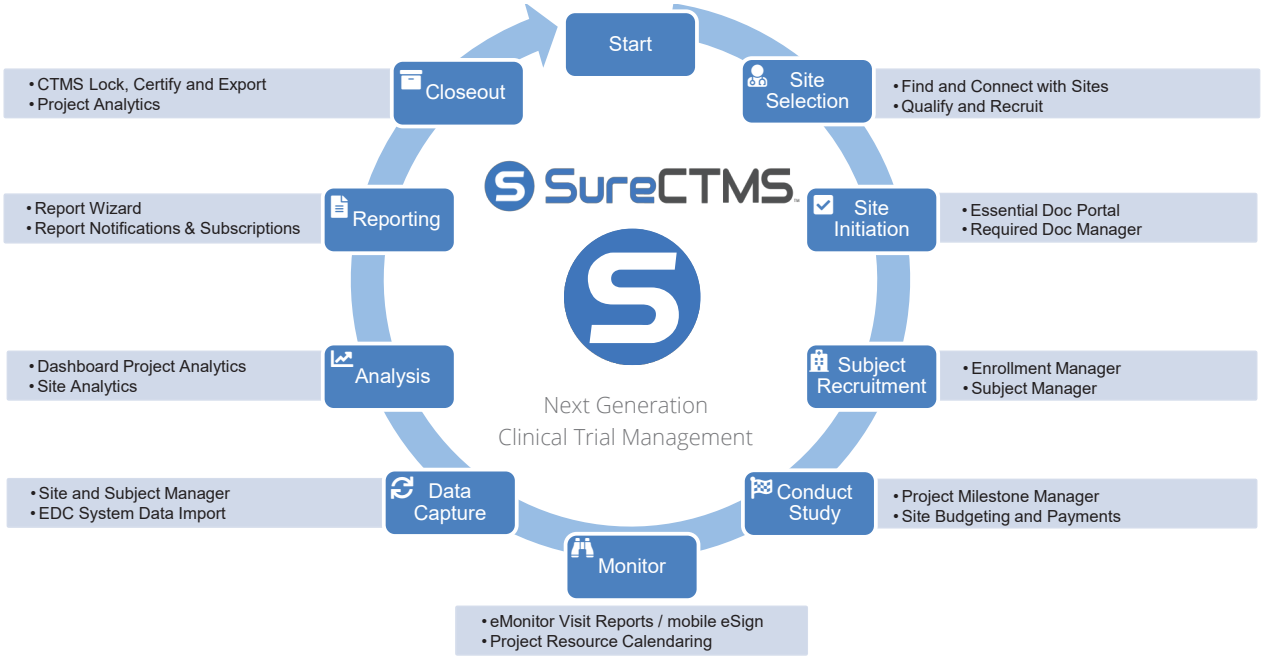

SureNetwork™

SureClinical
Health Science Applications

Automate Clinical Operations

Addressing the entire clinical trial management lifecycle

SureTeam Feature Summmary

Smart Site and Study Team Search

●Enhance the selection of clinical sites and investigators through SureTeam and SureNetwork, the industry's first trusted network of clinicians

●Get Insight into actual performance metrics, clinical trial experience, licensing, therapeutic areas of expertise, organization affiliations and more

●Quickly find sites, clinicians and staff with smart site search, map search, custom search

Create Customizable Project Teams

●After your Sites, Clinicians and Staff project team members have been selected as project team candidates in SureNetwork, click to add them to a Project Team in SureNetwork.

●Project teams can be organized by project name, therapeutic area, sponsor name, clinical study project name, and status.

●Project teams are reusable - simply select the entire project team during project startup, clone it, de-select unwanted project team members, create a new project team name, and save as a new project team for instant use in your new clinical study project

●Project team status - Project teams, Sites, Organizations, Clinicians and Persons involved in clinical studies can have the following project team status stage attributes, in order:

- **Candidate**: (one or more) project team members are candidates for the clinical study project associated with this Project Team
- **Qualify**: Project Team members are undergoing a review and approve workflow to be qualified to participate as an Active Site or project team members
- **Initiate**: Project Team members are completing essential document collection workflows to be qualified to participate as an Active Site or project team members
- **Active**: Site and team members are Active for the clinical study project associated with this Project Team
- **Closing**: Project Team members are completing study close out activities and workflows
- **Closed**: Project Team members have completed study activities and project team is closed.
- **Archived**: Project has been archived. and is inactive.
- **Inactive**: Project is inactive
- **Not Selected**: Project team was not selected.

Health Science Applications

Feature Summary, continued

Customizable Site, Clinician and Staff Fields, Tags and Notes

- Create custom attributes such as tags, custom fields and sticky notes for Sites, Clinicians and Staff, before, during or after the search process
- Save customization attributes for individual projects

Customizable File Attachments

- Add, view and share documents and file attachments for each Site, Clinician or Staff person profile - CV's, licenses, FD's or any other documents (requires SureDrive)
- Click to add site, organization, or profile file attachments to your clinical study document management system (requires SureETMF or other document management system

Create Customizable Site Qualification Surveys and Databases

- Automate the site qualification, review and approval process using automated site qualification survey questions, PDF templates, workflows and Adobe digital signing
- Standardize site qualification qualification surveys and response data via standard site survey question template libraries
- Create searchable site qualification databases from site qualification survey responses

Study Project Team Qualification Workflows

- **Project Team Site Candidate** - Review and Approve workflow. Send a named Project team with Site Candidate List for review and approval by selected persons.
- **Project Team Site Qualification** - Review and Approve workflow. Send a named Project team with Site Qualification List for review and approval by selected persons. Includes links to Site Organization form / response surveys for each Site.
- **Individual Candidate** - Review and Approve workflow. Send an individual selected candidate with Candidate status for review and approval by selected Persons/Users. Includes a link to the candidate's profile.
- **Individual Qualification** - Review and Approve workflow. Send an individual selected candidate with Qualification status for review and approval by selected Persons/Users. Includes a link to the candidate's qualification documents.
- **Study Startup Workflows** - For approved sites, select one or more sites and automatically create site study startup activity essential document workflows to send out document collections for completion via web portal or via email. (requires ETMF, purchased separately)
- **Project Team Vendor Candidate** - Review and Approve workflow. Send a named Project team with Vendor Candidate List for review and approval by selected persons.
- **Project Team Vendor Qualification** - Review and Approve workflow. Send a named Project team Vendor with completed Vendor Qualification List for review and approval by selected persons. Includes links to Vendor Qualification form / response surveys for each vendor.

Feature Summary, continued

Customizable Reports

Select from a library of customizable reports including:

- **Site Qualification Responses** - all sites or selected sites, country, PI
- **Project Team Selection Status** - Sites, Organizations, PI's, Persons: Name, Selection Status (Candidate, Qualifying, etc)
- **Custom Field Reports** - Utilize standard and custom fields for Sites, Organizations, PI's, Persons to create your own report.
- Reports can be saved as templates, shared with others
- CSV and PDF versions of reports
- Subscribe to reports or subscribe others to reports (admin function)

Customizable Study, Site, Organization and Clinician Performance Dashboards

- Capture, View, and Report on historical, actual and forecasted performance metrics for project team, site, organization and persons to precisely identify performance, issues and trends.
- Utilize standard performance metrics, customizable field attributes or combination of both for viewing performance metric dashboards, graphs, data and reports

Standard Site Analysis Performance Metrics

- Current Site Activation metrics = Time to IRB, SIV and FPI
- Date Investigator Package sent to site to 1st SIV
- Date Investigator Package sent to FPI
- Date Investigator Package sent to 1st IRB/Ethics approval
- Date Draft/Template Budget and CTA sent to site to CTA fully executed
- Screening and enrollment metrics (total enrolled, screen failed and consented)
- Enrollment and consent rates (months open, consent rate and enrollment rate pts/site/mo
- Queries (open, answered, closed and total)
- Timeliness of Data Entry (time from patient visit to data entered by site)
- Aging queries (<30, >30<60 and >60)
- Total SDV activity and % compliance
- EDC data entry (total expected, total complete, % complete, total complete, % incomplete, total missing and % missing)
- Number of escalated issues by quarter
- Number of significant protocol deviations
- Number of ineligible subjects enrolled

FDA 21 CFR Part 11, EC Annex 11 Compliance Validated

SureClinical's applications, data center, processes and systems are 21 CFR Part 11 and EC Annex 11 compliance validated. All data at rest and in transit is encrypted; we offer high security application instances with hourly backups.
