Platform Upgrade Release & FAQ

As part of our biweekly system maintenance, on Saturday 28 May 2022 we will be providing all Sure CRO customers and their licensed users with a free platform upgrade to our new Peak Productivity Platform. The Peak Productivity Platform adds the ability for users to access MS365 Office docs for FDA Part 11 digital signing, review and approval workflows and other team real-time collaboration features. With the new connector to MS365, Sure Users can access MS Word docs directly from within Sure Apps, saving the hassle of downloading and uploading. If you wish to know more about the new features of this platform, click here

Sharing Sure Outside of Your Organization

As you know, our pre-existing mutual MSA license agreement is between two parties: Your CRO Organization and SureClinical. All employees and contingent staff of your CRO organization may access Sure's online services. We've recently audited multiple CRO instances, and we've discovered that some CROs have shared access to their Sure application operations area with external unlicensed organizations and with unlicensed users. For security and licensing reasons, Sure's services are made available 'Solely for Your internal business operations,' as stipulated in our MSA. In an effort to protect and preserve user account security, clinical trial data security, and patient data privacy, with this maintenance update we'll be enforcing licensing terms as mutually agreed to in our MSA.

License Manager with In-App Purchasing

The Peak Platform Upgrade deployment will also include new licensing technology that provides administrators with the ability to add new user licenses in two clicks through our in-app purchasing feature. With the new license manager you'll be able to deploy new licensed users instantly, and you'll be able to detect and possibly prevent potential security issues such as unauthorized account sharing.

Third Party Organizations and Third Party Users Accessing Sure's Services

With this maintenance update, CRO's who have been sharing access to Sure's services with unlicensed third party organizations will be granted a transition period until 30 June 2022 to select one of the following options:

Option 1: Purchase Licenses for Unlicensed Third Parties under a CRO Reseller Agreement

- **Purchase platform license(s) for any unlicensed third party organizations (e.g. Sponsors)**
  - A Third party organization platform fee of $1,500/month with a 12 month minimum term will be due and payable prior to 30 June 2022
- **Purchase application power user licenses for each application currently being accessed by unlicensed third party users**
  - An Application Power User fee of $349/month/user with a 12 month minimum term will be due and payable prior to 30 June 2022 for each licensed user

Option 2: Refer Sponsor to SureClinical

- Use the CRO-Sponsor email template as a guide to refer sponsors to Sure.
  - Sponsors can purchase licenses directly from Sure
  - CROs may access the sponsor instance. Both the sponsor and the CRO must have active user licenses for the applications

Option 3: Delete Unlicensed User Accounts

- **Deactivate the accounts** for any unlicensed third party users by 30 June 2022

Platform Upgrade Frequently Asked Questions

Why is Sure upgrading the platform?

While we've always had a license agreement in place, we previously prioritized user experience over license enforcement. With this new release we've added new features that will enhance security and ensure that we can continue to provide you with the user experience, features and outstanding services that you expect from the Sure Team, while adhering to the terms and conditions of our pre-existing mutual license agreement. **It is necessary for all sponsors to have their own platform license, in order to better secure their data and provide an overall better experience.**

We don't have the funds to buy any licenses, can we get a fee waiver?

We're committed to providing our CRO customers with the user experience, features and outstanding services that you've come to expect from the Sure Team. In order to continue offering new features, security capabilities and enhancements, we need license enforcement and payment for our services. Waivers may be made available to not-for-profit organizations.

Are there any volume discounts for multiple unlicensed users?

CRO's who elect 'Option 1' - Execute a CRO Reseller Agreement, may be eligible for volume purchase discounts. Please contact your sales representative.
